

CVE-2025-27840 No Increased Security Risk From ESPRESSIF ESP32 VULNERABILITY

Boston Scientific is dedicated to helping ensure the safety and security of our products and has been closely monitoring the March 09, 2025 announcement and follow-on notifications regarding the initially described presence of a “backdoor” in Espressif ESP32 BLE chipsets.

Boston Scientific has completed an analysis of our devices, digital health apps and remote monitoring services and has determined that there is **no instance where the Espressif ESP32 chipsets are in use.**
