

MICROSOFT VULNERABILITY PRINTNIGHTMARE

Boston Scientific is dedicated to ensuring the safety and security of our products worldwide and has been closely monitoring the remote code execution (RCE) vulnerability in the Microsoft Windows Print Spooler Service known as PrintNightMare or CVE-2021-34527. Microsoft has reported that this vulnerability could allow unauthorized remote code execution through a network vector. Microsoft has released out-of-band security updates to address PrintNightMare.

Our global product cybersecurity team is in the process of determining if the vulnerability affects any Boston Scientific products. As we complete this analysis, we will provide an update to this bulletin.
